As a leader in disruptive times

you are aware that any routine thinking – even if rooted in past success – is a barrier to access your full potential. For you, continuous self-renewal is imperative.

In these times of enormous disruptive challenges leaders need a strong inner compass: They need utmost inner clarity to cope with utmost outer turmoil and to adapt quickly. These times call for the Sovereign Leader – leaders who embody a strong professional will and a personal humbleness, willing to transform themselves in order to transform their teams and their organizations.

“Purpose-driven Leadership in Kenya” is your opportunity to start transforming yourself into an even stronger Sovereign Leader as you develop your inner compass – your individual purpose – while serving a higher cause. The claim of this unique Leadership Programme is simple and straight: Grow yourself by helping others grow.

Sovereign Leaders are true game changers at the top. They *connect* to their individual purpose to build strength from within. They are *conscious* about themselves, their own strengths and limiting patterns, and the complex dynamics in the world around them. And they know how to unfold their and others' full *contribution* potential.
